Batteries Accus Technologies Acquisition

Eco-Bat Technologies Limited is pleased to announce that it has acquired Batteries Accus Technologies, a battery distribution company focused on the auto and leisure sector, currently operating from a single site at Varennes Vauzelles in the Burgundy region of France. This acquisition adds to the Group's battery distribution businesses based in the UK, Netherlands & Belgium.

This acquisition is in line with Eco-Bat Technologies past and future strategy of developing within its core businesses of lead recycling and production, other value added streams, such as fully owned raw material collectors activities and the sale of value added lead products, including new battery distribution.

Frederic Levert-Frebault will continue to manage the business and the business style, and development strategy of the company will remain unchanged. In this role, Frederic will report to Steve Sheppard, Managing Director of Manbat Ltd.

Martin Boddy
Managing Director, Global Battery Distribution Division
